About Me

An experienced IT professional passionate about System Administrator, DevOps, SRE, and IT Infrastructure. Skilled in Infrastructure Provisioning, Automation, and Monitoring. Certified by Alibaba Cloud in both Associated Cloud Computing and Cloud Security.

Experienced with GitLab CI/CD, Argo CD, Jenkins, Terraform, and Ansible to streamline development processes. Proficient in managing cloud services on GCP, AWS, Alibaba, Azure, and Huawei Cloud. Implemented monitoring and logging tools such as ELK, Prometheus, Grafana, Loki, and OpenSearch to ensure system performance visibility.

Skills

Operating System: Windows, Windows Server, Linux, FreeBSD, SUSE

Programming and Build Tools: Java, PHP, Python, Bash, Shell Scripting

Cloud Platform and Infrastructure: GCP, AWS, Azure, Alibaba, Huawei, Terraform, Ansible

DevOps and CI/CD: Git, GitHub, Gitlab, Argo CD, Docker, Harbor, Portainer, Jenkins, K8S

Monitoring and Orchestration: Prometheus, Grafana, Node Exporter, Observium, PRTG, MRTG

Log Management Service: ELK, Filebeat, Opensearch, Cerebro, Fluentbit, Kafka, Loki

Soft Skills: Problem-Solving, Communication, Team Collaboration

Languages: Bahasa Indonesia (Native), English (Intermediate)

Experience

Detikcom (South Jakarta, Indonesia)

System Engineer (April 2022 – Present)

- Managed and monitored Infrastructure in Server On-Premise and Public Cloud (GCP, Alibaba, Huawei Cloud) leveraging cloud-native services for scalability, high availability, and cost-efficiency
- Implemented secure Cloud Infrastructure using IAM, Workload Identity, Encryption, and Key Management
- Coordinating with the Software Developer to create and handle applications based on dev requirements, including setting environments like NodeJS, Python, PHP, Java, and Golang for programming language, Redis, RabbitMQ, NATS and Nginx
- Build, design, implement, and manage CI/CD pipelines using Gitlab & Gitlab Runner to automate code builds, testing, and deployment processes, ensuring fast and reliable software

delivery

- Implemented Infrastructure as Code using Terraform, and Ansible to streamline deployment processes and ensure consistent infrastructure management
- Implemented Monitoring Infrastructure with Node Exporter, Prometheus, and Grafana to visualize, accelerating the incident tracking process and improving response times
- Implementation of Log Service with ELK, and OpenSearch for serving Log Applications like Nginx Log, PHP Log, Python Log, Docker Log
- Moving Infrastructure from traditional service to container service solution using Docker Compose, Docker Swarm, And Kubernetes, enhancing scalability and operational efficiency
- Enhanced system availability and performance by developing a Static Management System utilizing Caching and CDN, resulting in improved user experience
- Build and Implementing Matomo as a Google Analytic Alternative using Docker, Redis Sentinel, PHP, Opcache
- Built and implemented a Streaming Engine using the Wowza Application, improving video delivery for (20.detik.com)

PT. Bangun Abadi Teknologi Indonesia (West Jakarta, Indonesia)

System Administrator (November 2018 – March 2022)

- Maintenance and Monitoring of all Public, Private, and Hybrid Servers (HyperV Manager, VCenter, or Vsphere ESXi)
- Manage Hosting and Mail System with cPanel
- Installation and Manage Mail Exchange (Zimbra, O365, Google Workspace, cPanel)
- Installation and Manage Public Cloud for Internal Office (NextCloud, OwnCloud)
- Maintenance and Monitoring Log Service (PRTG, Observium, MRTG, Graylogs)
- Manage System Backup Points and Replication for Client Server and Internal Server
- Manage all Server Internal and Clients in the Data Center

PT. Mitra Akses Globalindo (West Jakarta, Indonesia)

System Administrator Internship (July 2018 – October 2022)

- Monitoring and Managing Network Infrastructure (Mikrotik)
- Monitoring and Managing Linux Systems (Nginx, FTP, Rsync, Unbound, etc)

SMP Islam Raden Patah (Depok, Indonesia)

Part-time IT Administrator (September 2017 - June 2018)

- Create and Manage a Website using WordPress for Raden Patah Islamic School
- Manage all Network Infrastructure and CCTV
- Standby as Proctor in Ujian Nasional based on CBT

PT. Andalas Media Informatika (South Jakarta, Indonesia)

Technical Support (April 2015 - August 2015)

- Maintenance and monitoring of Client Networking Infrastructure
- Manage all Server Internal and Clients in the Data Center
- Monitoring the Helpdesk System as the first layer to handling problems from all client

PT. Nutrifood Indonesia (North Jakarta, Indonesia)

Networking Support Internship (September 2013 – December 2013)

- Maintenance and repair of all Computer and Hardware Services in the office
 - Being a Helpdesk Support to manage all problems
 - Maintenance and monitoring of IP Phone Systems
-

Education

Polytechnic State of Jakarta (2015 - 2019)

Bachelor in Informatics and Computer Engineering - IPK 3,63

- 3rd place in Junior Category – Gunadarma Overclocking Contest 2016
- 1st place in Movie Competition – CBX Short Movie UIN Jakarta 2016
- Staff of Communication and Information Department Himpunan Mahasiswa TIK (2016)
- Head of Education and Technology Department Himpunan Mahasiswa TIK (2017)

Vocational High School 1 Cibinong (2012 - 2015)

Computer Engineering and Networking Department

- 1st place in Hack The Game – Indonesia International Education & Training Expo 2015 (STMIK Nusa Mandiri)
- 2nd place in Information Technology/Networking Support Competition, Bogor Regional Level (2014)
- 3rd Networking Skill Competition – ITechnoCup 2015 Polytechnic State of Jakarta

Certification and License

- Certified Secure Computer User (EC-Council), Oct 2019 | ID: ECC4209583617
- Alibaba Cloud Computing, 2020 | ID: IACA01200200004505L
- Alibaba Cloud Security, 2020 | ID: IACA02200500008711L
- Fundamental Linux Administration Cybrary, May 2017 | ID: SC-175c108b0b-31c7f
- Network Technician BPPTIK Kominfo RI, 2017 | ID: 72501 2131 0009694
- Microsoft Technology Associate - Networking Fundamentals, 2015 | ID: F300-6266
